abbvie

Dear Healthcare Professionals.

We are delighted to invite you to the comprehensive AMI (AbbVie Medical Institute) workshop focused on the treatment of patients with episodic and chronic migraine. This workshop will provide in-depth insights into the mode of action of Botulinum toxin and Atogepant, along with hands-on injector training and discussions on the PREEMPT trial and phase 3 clinical studies.

Workshop Agenda

- **Understanding Migraine Pathophysiology:**
 Gain a comprehensive understanding of both episodic and chronic migraine. Explore the mechanisms underlying migraine attacks.
- **Botulinum Toxin in Migraine Treatment:**
 Learn the mode of action of botulinum toxin in migraine treatment. Review the clinical evidence and efficacy of botulinum toxin for migraine. Understand patient selection criteria and dosing strategies. Participate in a hands-on injector training session.
- **The PREEMPT Trial:**
 Review the pivotal PREEMPT clinical trial on botulinum toxin for chronic migraine. Discuss key findings and their implications for clinical practice.
- **Atogepant in Migraine Treatment:**
 Understand the mode of action and pharmacology of atogepant. Review the results from phase 3 clinical studies on atogepant. Discuss the efficacy, safety, and patient selection criteria for atogepant.
- **Interactive Case Studies:**
 Engage in discussion of real-world migraine cases. Improve decision-making skills in migraine management.
- **Q&A Session:**
 Open forum for questions and discussions

Objectives

Gain a comprehensive understanding of both episodic and chronic migraine.

Learn the mode of action of botulinum toxin in migraine treatment.

Review the pivotal PREEMPT clinical trial on botulinum toxin for chronic migraine.

Understand the mode of action and pharmacology of atogepant.

Engage in discussion of real-world migraine cases.

PREEMPT: Phase 3 REsearch Evaluating Migraine Prophylaxis Therapy
